Abdulrahman Salem Alshoubaili

+973 38704706 | abdulrahman.alshoubaili@gmail.com | LinkedIn | GitHub | Portfolio | Bahrain

Profile

Final-year Cybersecurity student (GPA 3.62/4.0) and Software Engineer at the Information & eGovernment Authority, with network engineering and DevOps experience. eJPTv2 certified, working across offensive and defensive security. Seeking a cybersecurity or networking internship.

Education

B.Sc. Information and Communication Technology, Bahrain Polytechnic Sep 2022 - Present
Cybersecurity Major | GPA: 3.62 / 4.0 | Expected Graduation: 2027

Alhidaya Alkhalifiah Secondary School Sep 2019 - Jun 2022
Final Grade: 96.1 / 100

Experience

Information & eGovernment Authority (iGA) | *Software Engineer* Sep 2026 - Present

- Build and deploy government services on AWS (EC2, S3, Lambda, RDS) and maintain CI/CD pipelines.
- Manage IAM roles and policies and monitor resources with CloudWatch.

Bahrain Polytechnic | *PASS Leader* Sep 2026 - Present

- Lead Peer-Assisted Study Sessions that help students master challenging course material and prepare for exams.

Neutel Communication and Network | *Network Engineer* Jul 2026 - Sep 2026

- Configured VLANs, trunking, Spanning Tree, inter-VLAN routing, and static and OSPF routing between sites.
- Troubleshot connectivity with ping, traceroute, and device logs, and documented topology changes.

ConfidencEway | *DevOps Engineer Intern* Jun 2025 - Sep 2025

- Built Datadog alerting for server health and ran SIEM-based log analysis to catch anomalies.
- Containerized applications with Docker for more consistent releases.

Projects

SOC Detection Lab | View Project
Built an 11-VM SOC across four phases (flat network, routing, firewall with DMZ and NAT, IPsec VPN), running attacks and correlating multi-source evidence to detect them.
Tools: Wazuh, Suricata, Zeek, OPNsense, VyOS, Velociraptor, Zabbix, Grafana

AI-Powered Intrusion Detection System | View Project
Machine learning IDS that detects anomalies in live network traffic, tested against simulated attacks.
Tools: Python, Machine Learning, IDS, Virtual Machines

GRC Framework for the Aviation Sector | View Project
Auditable GRC framework in Eramba covering control mapping, policy review cycles, and risk tracking.
Tools: Eramba, Policy Management, Control Management, Risk Assessment

Threat Intelligence and Hunting Platform | View Project
SIEM and SOAR pipeline with custom Wazuh rules and log correlation for threat hunting across a simulated enterprise.
Tools: Wazuh, SIEM, SOAR, Bash

Defense-in-Depth Network Topology | View Project
Segmented multi-zone EVE-NG network with perimeter firewalls and a DMZ, validated with Nmap.
Tools: EVE-NG, Nmap, Network Segmentation, Firewalls

Ethical Hacking Assessment | View Project
Full penetration test from recon to post-exploitation, with a severity-rated findings and remediation report.
Tools: Kali Linux, Metasploit Framework, Nmap

Hackathons

BisB Next-Gen Islamic Investment Innovation Product Hackathon | *Participant* Oct 2026
Bahrain Islamic Bank & INJAZ Bahrain | Bahrain Polytechnic Team 3 | View Project

- Co-designed and pitched Zumra Pool, a Sharia-compliant pooled investment feature for the BisB app; interviewed by Al-Watan.

Licenses and Certifications

- **Google Cybersecurity Professional Certificate**, Google / Coursera | Verify
- **Junior Penetration Tester, eJPTv2**, eLearnSecurity / INE | Verify
- Networking Fundamentals, Udemy / Cyber Mona Training Center
- Practical Diploma in Cybersecurity, IFPS Institute

Skills

Penetration Testing: Kali Linux, Metasploit Framework, Nmap, Burp Suite, TCP Port Scanning, Vulnerability Analysis, Web Application Testing

Defensive Security: SIEM, SOAR, Wazuh, Suricata, Zeek, Velociraptor, IDS, Incident Response, Digital Forensics, Threat Hunting, Log Management

GRC and Compliance: Eramba, Security Policy Management, Risk Assessment, Control Management, Compliance Mapping

Cloud and DevOps: Docker, AWS, Azure, Virtual Machines, EVE-NG, Cisco Packet Tracer, Infrastructure Monitoring

Programming: Python, Bash

Operating Systems: Kali Linux, Windows

Languages: Arabic (Native) | English (Professional)
